(Australian Resource Centre for Healthcare Innovations)	Australian Federation of Medical Women, and Office of the Status of Women, DPM&C, \$50,000
2004-2006	Culturally and linguistically diverse training for Home and Community Services	Eisenbruch, M. and NSW Transcultural Aged Care Service, Aged Care Services Association NSW and NSW Ethnic Communities Councils	NSW Department of Ageing, Disability and Home and Community Care, \$165,000
2004-05	Re-imagining Peace After Massacres: A Trans-Disciplinary and Comparative Effort Towards the Prevention of Failed States and Rebuilding of Functioning Societies	Poulligny, B. (Centre for International Studies and Research, France), Virginia Foundation for the Humanities/University of Virginia, University of Lausanne, University of Turin, and others – Associate Investigator	Ford Foundation, USD20,000
2004	Identification of preferred media for translated health information for Chinese, Russian and Greek patients attending St Vincent's Hospital and Sydney Hospital/Sydney Eye Hospital	Blignault, I., Eisenbruch, M., and Stephanou, M.	St Vincent's Hospital, \$12,300
2004	Gender-based Medical Education	Casper, M., Eisenbruch, M. and others (AFMW, Monash, Adelaide, Melbourne and other Universities)	Australian Federation of Medical Women, and Office of Status of Women, DPM&C, \$54,00
2004	Women Talk Cancer	Dunn, S., Boyle, F., Heinrich, P., Masselos, P. (University of Sydney), and G. Casper (AFMW)	Australian Federation of Medical Women, and Office of Status of Women, DPM&C, \$50,000
2003	Network seeding grant (for Sources of Insecurity Network, with RMIT University, ANU, Deakin, UTS)	Kippax, S., Zwi, A., Humphrey, M., Silove, D., Worth, H., Reid, E., Eisenbruch, M., Jolly, M., Aggleton, P., and others – Lead organisation: University of New South Wales	ARC, \$10,000
2003-05	Australia-Canada collaboration on health and conflict - – Preventing violence, recovery and building the peace	Zwi, A, Silove, D., Humphrey, M., Eisenbruch, M., and Whelan, A.	AusAID, \$300,000 (\$150,000 p.a.)
2003-04	Evaluation of a Multicultural drug education program Cabramatta	Eisenbruch, M., and Rotem, A.,; Cabramatta Program	NSW Cabinet Office, \$50,000
2003	Use and effectiveness of health care interpreters in hospital Emergency Departments	Blignault, I., Stephanou M., Eisenbruch, M.	Various Area Health Services, \$19,800

	Project	Investigators	Funding
	Cultural competence in HIV/AIDS prevention in Cambodia	Eisenbruch, M.	John Hirschman Fund, \$5,000
2002-	Multicultural Families First	Moore, G. (SWSAHS), Eisenbruch, M. and others	NSW Health, and Cabinet Office, \$670,000
2002-	Development of a transcultural mental health focus in undergraduate medicine at UNSW		WSAHS, \$20,000
	Cohort study of risk factors for young driver injuries	Norton, R., Stevenson, M. R., Woodward, M., Williamson, A. M., Eisenbruch, M., Carseldine, D. C. University of Sydney	NHMRC, ID301985. \$681,250 (2002: \$235,000, 2003: \$235,000, 2004: \$211,250)
2001-	National study of multicultural health nursing	Eisenbruch, M and Rotem, A.	Dept of Education, Science & Training, \$50,000
	A national multicultural health research agenda	Eisenbruch, M.	Dept of Health and Ageing, Dept of Immigration & Multicultural & Indigenous Affairs, \$350,000
	Statewide research in multicultural health	Eisenbruch, M.	NSW Health, \$300,000
	Gendering in women's health and cancer	Eisenbruch, M.	SESAHS, \$25,000
2000-	Cultural context of end of life care	Eisenbruch, M.	SESAHS, \$20,000
	Utilisation of services by people of non-English speaking background	Eisenbruch, M., and Rotem, A., (with Nathan, S.)	SESAHS, \$25,000
	Strategies for multicultural health research	Eisenbruch, M.	SESAHS, \$20,000
	NSW Young Drivers Cohort Study [pending funding application]	R. Norton et al., Institute for International Health	Application to RTA, MAA
	Nutritional studies of Vietnamese children	Allen, J. et al., (Fairfax Institute), and Eisenbruch, M. - Associate	Financial Markets, \$50,000
	Chinese women at genetic risk of breast and bowel cancer	M. Eisenbruch, B.Meiser et al., Prince of Wales Hospital	SESAHS, \$10,000
1997-99	Comparative study in Thailand, Cambodia, and Laos, of representations of AIDS. Reducing risk behaviour.	Lemoine, J. (CNRS) and Eisenbruch, M.	Agence Nationale de Recherches sur le SIDA, France. \$40,000
1998	Women, children and blood – Traditional healing and STD/HIV/AIDS among women and children in Cambodia	Eisenbruch, M.	ARC
1997-	Promoting behaviour change in malaria prevention and impregnating hammock nets in Kratie province, Cambodia	Eisenbruch, M. (Consultancy with WHO)	

	Project	Investigators	Funding
1997	Fluphenazine meta-analysis and review	Adams, C., and Eisenbruch, M. (Cochrane Collaboration, Oxford)	
1997-99	Childhood psychosocial problems and disorders and local treatments in Cambodia	Eisenbruch, M.	NHMRC. \$34,000, \$22,000, \$37,000
	The development of culturally relevant training in community psychosocial and mental health	van de Put, W., de Jong, J. – (Eisenbruch, M. Associate)	Ministry of Foreign Affairs (DGIS), Netherlands
1996-	Local practitioners and puerperal illnesses in Cambodia	Eisenbruch, M.	ARC
1993-96	Local concepts and management of physical and mental disorders in Cambodia	Eisenbruch, M. (University of Melbourne/CNRS, France)	ARC
		Eisenbruch, M. (CNRS, France)	Ministry for Higher Education and Research, France, \$20,000
	Curriculum development at Phnom Penh University	Eisenbruch, M and Crochet, S. Eisenbruch, M. (Department of Psychology, Phnom Penh University)	Fondation Le Grand, France Overseas Service Bureau, \$12,200
		Eisenbruch, M. (University of Melbourne)	Wenner Gren Foundation, New York, \$15,000
1983-90	Cambodian refugee adolescents in group and foster care, and cultural bereavement	Eisenbruch, M. (Harvard Medical School)	NHMRC; William Buckland Foundation; Danks Trust; William Angliss Fund; Percy Baxter Trust; E. B. Myer Fund
1983	Cross-cultural issues in bereavement and its health consequences	Eisenbruch, M. (Institute of Medicine)	Institute of Medicine, National Academy of Sciences, USA
1981-82	Adaptation and health of Vietnamese mothers and children	Eisenbruch, M. (University of Cambridge)	Association of Commonwealth Universities, UK
1977-81	Depressed mothers and their children	Eisenbruch, M. (RCH)	NHMRC Medical Postgraduate Research Scholarship, \$19,000; Uncle Bobs Scholarship, \$9,000; RCH Research Foundation, \$9,000

Appendix B - Publications

Context

My publications across multiple disciplines demonstrates the breadth of my contributions to medical anthropology; transcultural psychiatry; cross-cultural psychology; global public health; and human rights. Web of Science Cited Reference Index Visualization Treemap (Figure 1),

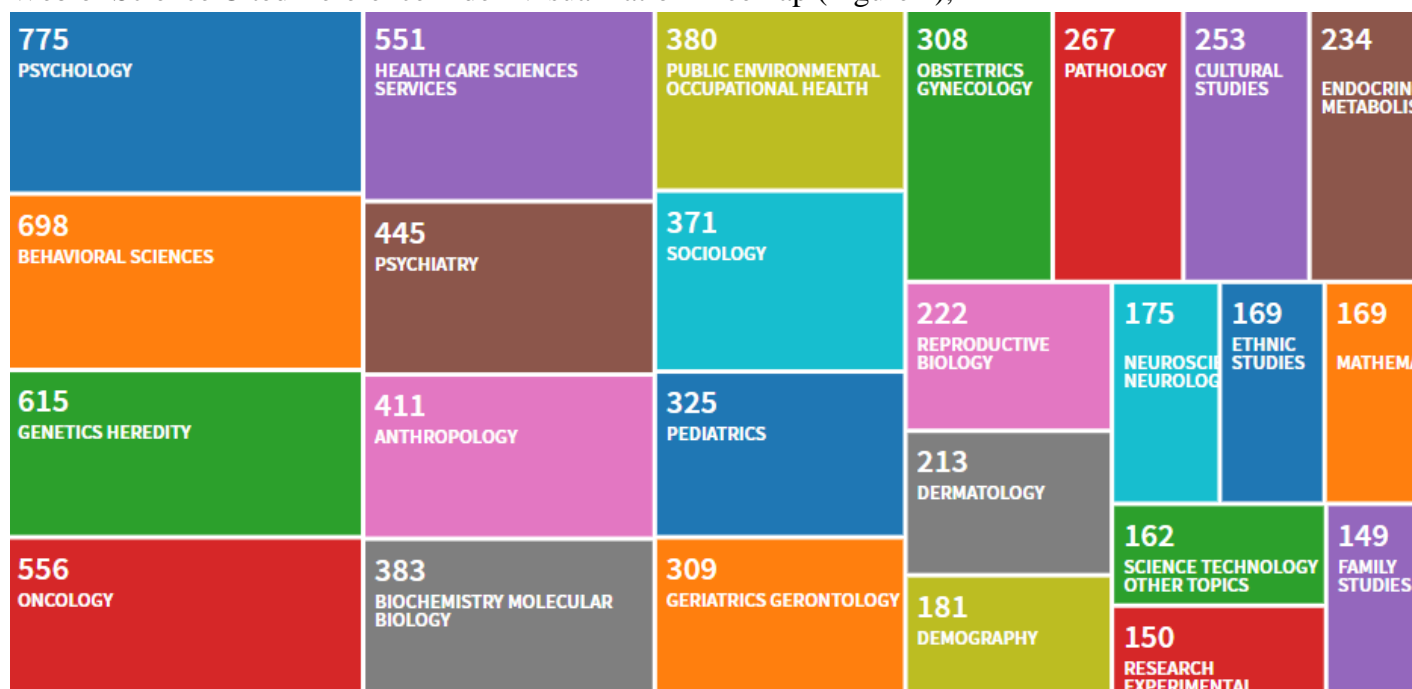

Figure 1 Treemap of fields of research, showing number of citations in each field, mapped by Web of Science Cited Reference Index

Journal esteem. I have published in highly ranked journals across these fields as judged by Scimago Journal & Country Rank (SJR) prestige indicator, e.g. *Social Science & Medicine* SJR 1.739, *Child Abuse & Neglect* SJR 1.7, *Transcultural Psychiatry* SJR 0.716.

Since 1981, I have produced a career total of 300 publications (including 1 edited book, 22 book chapters, 77 journal articles, 59 conference proceedings, 7 published reports, 9 web-mounted publications, 18 reports, 71 invited papers and 54 other conference papers). 176 of these publications have attracted a **total of 7,439 citations**, resulting in an h-index of 38 (see Google Scholar, 11 December 2020). I am sole or first author of three-quarters of my publications. In the social sciences, unlike the multi-authored series of papers in STEM sciences, such outputs often represent long periods of intensive research. My publications benchmark highly in relation to expectations in my various disciplines and fields.

Bereavement. My seminal papers on **cross-cultural aspects** of bereavement have become classics in bereavement studies for both western and resource-poor countries. This work is based on participation in a landmark project of the US Institute of Medicine, and published in *Culture, Medicine & Psychiatry* [H index 46] (386 citations). This work gave rise to a new concept, ‘**cultural bereavement**’, first published in *Social Science & Medicine* [I.F. 2.733, H index 195] (757 citations). This led to a series of single-author publications in *Journal of Refugee Studies* [I.F. 5, H index 37] (25 citations), *Journal of Nervous and Mental Disease* [I.F. 1.682] (128 citations), *Journal of Intercultural Studies* [I.F. 1.054, H index 20] and *Collegium Antropologicum* [H index 33] (19 citations) and in a publication on acculturation and homesickness (10 citations). The concept of cultural bereavement has changed thinking about the mental health of diasporas, trauma, and approaches used in refugee and migration studies.

Trauma and post-traumatic stress. My publications on trauma and post-traumatic stress in authoritative journals such as *Social Science & Medicine* (743 citations), *Journal of Nervous and Mental Disease* (108 citations), *Journal of Traumatic Stress* [I.F. 2.721, H index 111] (115 citations), in collaboration with Professor Joop de Jong and Willem van de Put and *Social Psychiatry & Psychiatric Epidemiology* [IF 2.537, H index 97] with my PhD student Dzenana Kartal have evolved from an early challenge to the then-popular

argument for the universality of PTSD and critical debate on the medicalisation of human suffering (see Summerfield) and on modern theories of PTSD. Recent research on **disasters** is published in *Journal of Risk Research* [H index 51], *International Journal of Disaster Risk Reduction* [H index 28] and *Journal of Religion and Health* [H index 27] and My esteem is further indicated in invited book reviews to prestigious journals such as *Journal of the Royal Anthropological Institute* [I.F. 1.229, H index 50].

Mental health. My earliest papers from the 1980s focused on depressed mothers and their children, and were published in *Journal of Paediatrics and Child Health* [I.F. 1.0, H index 65] and in invited contributions to edited volumes by luminaries such as E James Anthony. In collaboration with Professor Gordon Parker, former Executive Director, Black Dog Institute and my PhD student Bibiana Chan, I have published on depression among Chinese immigrants, in *Psychological Medicine* [I.F. 6.159, H index 170] (104 citations). With Professor Clive Adams, I published a systematic review of fluphenazine, in the *Cochrane Database* [I.F. 6.124] (93 citations). Other papers on cultural aspects of mental health services for Chinese patients, published in *International Journal of Social Psychiatry* [I.F. 1.147, H index 91] (111 citations) and, in collaboration with the George Institute, on risk reduction among young drivers, published in *Injury Prevention* [I.F. 1.693] (67 citations), continue to influence service providers. Further publications in psychosomatics and the mind-body, starting with ‘wind illness’, were published in the prestigious *British Journal of Psychiatry* [I.F. 7.06, H index 192] (49 citations) and *Keio Journal of Medicine*, and with my PhD student Husna Razee on women in the Maldives.

Culture and meaning. Cross-cutting these papers is the examination of *meaning* of illness. My earliest published papers during the 1980s, influenced by my mentors Professors Arthur Kleinman and Leon Eisenberg at Harvard, were on cultural Explanatory Models, and published in journals such as *Psychiatric Clinics of North America* [I.F. 2.134, H index 82] (135 citations). Even after 25 years, students and researchers continue to adapt the Mental Distress Explanatory Model questionnaire in settings across Africa, Asia and the Americas.

Non-Communicable Disease (NCD). Three multi-authored papers on **cancer** have been published in top-ranking journals in the field, including the prestigious *Nature* [I.F. 40.137, H index 1,011] (2,539 citations), *BMC Medicine* [I.F. 7.249, H index 87] (38 citations), *PloS One* [I.F. 2.806] and *Cancer Epidemiology and Prevention Biomarkers* [H index 166]. Collaboration with leaders in psycho-oncology such as Professor Phyllis Butow (University of Sydney) has resulted in a series of multi-authored publications between 2003-16 on cancer care for culturally and linguistically diverse communities, in which my contribution was on cultural competence, in *Journal of Clinical Oncology* [24.008, H index 463] (73 citations), *Annals of Oncology* [I.F. 11.855, H index 190] (33 citations), *European Journal of Cancer* [I.F. 5.417, H index 170] 40 citations), *Psycho-Oncology* [I.F. 2.443, H index 113] (107 citations), *Patient Education & Counseling* [I.F. 2.232, H index 107] (64 citations), *Asia-Pacific Journal of Clinical Oncology* [I.F. 1.959, H index 18], and *Cancer Forum* [H index 11]. Other papers were published in *Supportive Care in Cancer* [I.F. 2.698, H index 87] (177 citations) and *Quality of Life Research* [I.F. 2.334, H index 118], and have influenced the provision of cancer care services. A seminal report in collaboration with my Harvard exchange student Lauren Handelman on astrocytoma, published in *Social Science & Medicine* (45 citations) has influenced cultural consultation in oncology. Another line, published with my PhD student Abbas Haghshenas and Professor Patricia Davidson, was on cultural competence in **heart health**, published in *Journal of Clinical Nursing* [I.F. 1.278, H index 78] (23 citations). These publications have informed health literacy and in primary prevention of illness such as diabetes.

Genetics. My research has provided the intellectual scaffolding for transcultural understanding of **genetics**. An early paper with Menahem and Handelman on cultural influences on Mucopolysaccharidosis VI, published in *Clinical Pediatrics* [I.F. 1.371, H index 54], is cited in textbooks on inborn errors of metabolism. Co-authored publications with Professors Meiser and Barlow-Stewart that appeared in *Genetics in Medicine* [I.F. 8.229, H index 95] (60 citations), *Social Science & Medicine* (52 citations) and *Journal of Medical Genetics* [I.F. 5.451, H index 148] (43 citations) have significantly influenced genetic counselling services in Australia.

Cultural competence. Several of my publications have influenced medical and nursing education in Australia, appearing in journals such as *Journal of Psychiatric Education*, *Medical Journal of Australia* [I.F. 3.369, H index 112] (29 citations) and *Australian Mosaic*. These publications enriched the evidence base for

multicultural health in Australia – federally, the Productive Diversity Partnerships Program of the Department of Immigration and Multicultural Affairs and, at a statewide level, NSW Health. In the Mekong Region, a cultural toolkit for UNESCO's cultural diversity lens framework (Programme IV.2 MLA IV 222) was published on the UNESCO website.

Traditional healing and Buddhist studies. During the 1990s, I worked at the National Centre for Scientific Research where, in collaboration with Francophone scholars, I published a series of papers on traditional healing in *Homme, Bulletin de l'École française d'Extrême-Orient* (60 citations), and *Péninsule*, among the prestigious Francophone journals in both social sciences and mainland Southeast Asian scholarship. I also published on indigenous taxonomies, and on traditional healers and social justice, in *Bulletin of the Royal Institute for Inter-Faith Studies* and incorporated in community mental health service development in Cambodia, in an article in *Social Science & Medicine* co-authored with PI van de Put and Professor Daya Somasundaram, have been applied in Cambodia to community mental health (92 citations). These publications have influenced the burgeoning field of Buddhist psychotherapy. This body of work has been cited by authors globally including in Ethiopia, South Africa, Zimbabwe, Mozambique, China and Southeast Asia and in studies on refugees in Australia and New Zealand.

Children. An early publication on the mental health of refugee children published in *International Migration Review* [H index 77] continues to be widely cited (230 citations). It was followed by the first description, published in *Clinical Child Psychology and Psychiatry* [I.F. 1.145, H index 174], of indigenous concepts of childhood illness in Cambodia. The esteem of this body of work is evidenced by chapters in multiple editions of textbooks of global child and adolescent mental health. My collaborative research in Australia on state-wide programs such as Families First, was published in *European Journal of Clinical Nutrition* [I.F. 2.709, H index 129] (21 citations).

Communicable Diseases. My Francophone publications, e.g. in *Sociétés Asiatiques face au Sida*, focused on contagious and communicable diseases. Reports for agencies such as UNESCO/UNFPA have influenced the national HIV/AIDS program in Cambodia and national social marketing programs for malaria prevention. Publications under consideration are on COVID-19.

Cultural context of violence. Since 2000, my trajectory, supported by ARC DP and LP grants, has focused on violence in Cambodia. A series of chapters (2000-4) with PI van de Put identified violence in the context of community mental health. A chapter published by UN University Press was the first to identify cultural competence in post-mass-crime peace-building. Recent papers on mass fainting, published in *Transcultural Psychiatry* [I.F. 2.28, H index 40] and *Journal of Religion and Health*, add to knowledge on structural violence. Publications on direct violence have appeared in the *ANZ Journal of Psychiatry* [I.F. 3.407], violence against women, in *Culture, Medicine & Psychiatry* [I.F. 1.288, H index 46], and on the cultural epigenesis of child abuse in Cambodia, in *Child Abuse & Neglect* [I.F. 2.397, H index 114], the benchmark journal in the field. and on child abuse, are a breakthrough in mapping the cultural epigenesis of violence and challenge the extant Theory of Change. Two publications on impunity, in *International Journal of Human Rights* [H index 11], apply the discovery of cultural epigenesis and are expected to influence scholarship in human rights and public violence.

Monographs

1. Multicultural Nursing Education. Canberra: Department of Education, Science and Training. ISBN 0 642 77246 0 (<http://catalogue.nla.gov.au/Record/959646>).
